## SECTION 1: Identification of the substance/mixture and of the company/undertaking

#### 1.1 Product identifier

Trade name	: Shell Omala S2 GX 220
Product code	: 001F1177

#### 1.2 Relevant identified uses of the substance or mixture and uses advised against

Use of the Sub- stance/Mixture	: Gear lubricant.
Uses advised against	: This product must not be used in applications other than those listed in Section 1 without first seeking the advice of the sup- plier.

#### 1.3 Details of the supplier of the safety data sheet

Manufacturer/Supplier	: Shell UK Oil Products Limited Shell Centre London SE1 7NA United Kingdom
Telephone Telefax Contact for Safety Data	: (+44) 08007318888 : : If you have any enguiries about the content of this SDS
Sheet	please email lubricantSDS@shell.com

1.4 Emergency telephone number

: +44 (0) 1235 239 670 (This telephone number is available 24 hours per day, 7 days per week)

## **SECTION 2: Hazards identification**

### 2.1 Classification of the substance or mixture

### Classification (REGULATION (EC) No 1272/2008)

Based on available data this substance / mixture does not meet the classification criteria.

## 2.2 Label elements

### Labelling (REGULATION (EC) No 1272/2008)

Hazard pictograms Signal word	:	No Hazard Symbol required No signal word
Hazard statements	:	PHYSICAL HAZARDS: Not classified as a physical hazard according to CLP

According to EC No 1907/2006 as amended as at the date of this SDS

# Shell Omala S2 GX 220

Version 3.1	Revision Date: 05.06.2023	SDS Number: 800001029885	Date of last issue: 21.09.2022 Print Date 06.06.2023

Safety data sheet available on request.

### 2.3 Other hazards

This mixture does not contain any REACH registered substances that are assessed to be a PBT or a vPvB.

Ecological information: The substance/mixture does not contain components considered to have endocrine disrupting properties according to REACH Article 57(f) or Commission Delegated regulation (EU) 2017/2100 or Commission Regulation (EU) 2018/605 at levels of 0.1% or higher.

Toxicological information: The substance/mixture does not contain components considered to have endocrine disrupting properties according to REACH Article 57(f) or Commission Delegated regulation (EU) 2017/2100 or Commission Regulation (EU) 2018/605 at levels of 0.1% or higher.

Prolonged or repeated skin contact without proper cleaning can clog the pores of the skin resulting in disorders such as oil acne/folliculitis. Used oil may contain harmful impurities. Not classified as flammable but will burn.

### **SECTION 3: Composition/information on ingredients**

#### 3.2 Mixtures

Chemical nature	<ul> <li>Highly refined mineral oils and additives. The highly refined mineral oil contains &lt;3% (w/w) DMSO- extract, according to IP346. Classification based on DMSO extract content &lt; 3% (Regula- tion (EC) 1272/2008, Annex VI, Part 3, Note L).</li> </ul>
	<ul> <li>* contains one or more of the following CAS-numbers</li> <li>(REACH registration numbers): 64742-53-6 (01-2119480375-34), 64742-54-7 (01-2119484627-25), 64742-55-8 (01-2119487077-29), 64742-56-9 (01-2119480132-48), 64742-65-</li> </ul>

## **SECTION 4: First aid measures**

### 4.1 Description of first aid measures

Protection of first-aiders	When administering first aid, ensure that you are appropriate personal protective equipment accord incident, injury and surroundings.	
If inhaled	No treatment necessary under normal conditions of If symptoms persist, obtain medical advice.	of use.
In case of skin contact	Remove contaminated clothing. Flush exposed ar ter and follow by washing with soap if available. If persistent irritation occurs, obtain medical attent	
In case of eye contact	Flush eye with copious quantities of water. Remove contact lenses, if present and easy to do rinsing. If persistent irritation occurs, obtain medical attent	
If swallowed	In general no treatment is necessary unless large are swallowed, however, get medical advice.	quantities

### 4.2 Most important symptoms and effects, both acute and delayed

Symptoms	: Oil acne/folliculitis signs and symptoms may include formation
	of black pustules and spots on the skin of exposed areas.
	Ingestion may result in nausea, vomiting and/or diarrhoea.

According to EC No 1907/2006 as amended as at the date of this SDS

	-	meo		nd special treatment needed	
Treat	ment	:	Notes to doctor Treat symptom		
SECTION	N 5: Firefighting mea	sur	es		
5.1 Exting	uishing media				
Suital	ble extinguishing media	:	Foam, water spray or fog. Dry chemical powder, carbon diox- ide, sand or earth may be used for small fires only.		
Unsu media	itable extinguishing a	:	Do not use water in a jet.		
5.2 Specia	al hazards arising from	n the	e substance or r	nixture	
Specific hazards during fire- fighting		:	Hazardous combustion products may include: A complex mixture of airborne solid and liquid particulates a gases (smoke). Carbon monoxide may be evolved if incomplete combustion occurs. Unidentified organic and inorganic compounds.		
5.3 Advice	e for firefighters				
	al protective equipment : Proper protective equipment including chemical resistant fighters : gloves are to be worn; chemical resistant suit is indicated large contact with spilled product is expected. Self-Conta Breathing Apparatus must be worn when approaching a f a confined space. Select fire fighter's clothing approved to relevant Standards (e.g. Europe: EN469).		e worn; chemical resistant suit is indicated if ith spilled product is expected. Self-Contained ratus must be worn when approaching a fire in ce. Select fire fighter's clothing approved to		
Speci ods	ific extinguishing meth-	:		ng measures that are appropriate to local cir- d the surrounding environment.	

## 6.1 Personal precautions, protective equipment and emergency procedures

	· · · · · · · · · · · · · · · · · · ·
:	<ul><li>6.1.1 For non emergency personnel:</li><li>Avoid contact with skin and eyes.</li><li>6.1.2 For emergency responders:</li><li>Avoid contact with skin and eyes.</li></ul>
:	Use appropriate containment to avoid environmental contami- nation. Prevent from spreading or entering drains, ditches or rivers by using sand, earth, or other appropriate barriers.
	Local authorities should be advised if significant spillages cannot be contained.
	:

According to EC No 1907/2006 as amended as at the date of this SDS

# Shell Omala S2 GX 220

Version	Revision Date:	SDS Number:	Date of last issue: 21.09.2022
3.1	05.06.2023	800001029885	Print Date 06.06.2023

### 6.3 Methods and material for containment and cleaning up

Methods for cleaning up	:	Slippery when spilt. Avoid accidents, clean up immediately. Prevent from spreading by making a barrier with sand, earth or other containment material. Reclaim liquid directly or in an absorbent. Soak up residue with an absorbent such as clay, sand or other suitable material and dispose of properly.
-------------------------	---	--

### 6.4 Reference to other sections

For guidance on selection of personal protective equipment see Section 8 of this Safety Data Sheet., For guidance on disposal of spilled material see Section 13 of this Safety Data Sheet.

### **SECTION 7: Handling and storage**

7.1 Precautions for safe handlin	g
Technical measures	<ul> <li>Use local exhaust ventilation if there is risk of inhalation of vapours, mists or aerosols.</li> <li>Use the information in this data sheet as input to a risk as- sessment of local circumstances to help determine appropri- ate controls for safe handling, storage and disposal of this material.</li> </ul>
Advice on safe handling	<ul> <li>Avoid prolonged or repeated contact with skin.</li> <li>Avoid inhaling vapour and/or mists.</li> <li>When handling product in drums, safety footwear should be worn and proper handling equipment should be used.</li> <li>Properly dispose of any contaminated rags or cleaning materials in order to prevent fires.</li> </ul>
Product Transfer	: Proper grounding and bonding procedures should be used during all bulk transfer operations to avoid static accumulation.
Hygiene measures	: Exposure to this product should be reduced as low as reason- ably practicable. Reference should be made to the Health and Safety Executive's publication "COSHH Essentials".
7.2 Conditions for safe storage,	including any incompatibilities
Further information on stor- age stability	<ul> <li>Keep container tightly closed and in a cool, well-ventilated place.</li> <li>Use properly labeled and closable containers.</li> <li>Store at ambient temperature.</li> <li>Refer to section 15 for any additional specific legislation covering the packaging and storage of this product.</li> <li>The storage of this product may be subject to the Control of Pollution (Oil Storage) (England) Regulations. Further guid-</li> </ul>

office.

### **SECTION 8: Exposure controls/personal protection**

#### 8.1 Control parameters

### **Occupational Exposure Limits**

Components	CAS-No.	Value type (Form of exposure)	Control parameters	Basis
Oil mist, mineral	Not As- signed	TWA (inhalable fraction)	5 mg/m3	US. ACGIH Threshold Limit Values
Oil mist, mineral		TWA (Inhalable particulate matter)	5 mg/m3	ACGIH

### **Biological occupational exposure limits**

No biological limit allocated.

### 8.2 Exposure controls

#### Engineering measures

The level of protection and types of controls necessary will vary depending upon potential exposure conditions. Select controls based on a risk assessment of local circumstances. Appropriate measures include:

Adequate ventilation to control airborne concentrations.

Where material is heated, sprayed or mist formed, there is greater potential for airborne concentrations to be generated.

General Information:

Define procedures for safe handling and maintenance of controls.

Educate and train workers in the hazards and control measures relevant to normal activities associated with this product.

Ensure appropriate selection, testing and maintenance of equipment used to control exposure, e.g. personal protective equipment, local exhaust ventilation.

Drain down system prior to equipment break-in or maintenance.

Retain drain downs in sealed storage pending disposal or subsequent recycle.

Always observe good personal hygiene measures, such as washing hands after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants. Discard contaminated clothing and footwear that cannot be cleaned. Practice good housekeeping.

According to EC No 1907/2006 as amended as at the date of this SDS

# Shell Omala S2 GX 220

Version	Revision Date:	SDS Number:	Date of last issue: 21.09.2022
3.1	05.06.2023	800001029885	Print Date 06.06.2023

#### Personal protective equipment

The provided information is made in consideration of the PPE directive (Council Directive 89/686/EEC) and the CEN European Committee for Standardisation (CEN) standards.

Personal protective equipment (PPE) should meet recommended national standards. Check with PPE suppliers.

Eye protection	:	If material is handled such that it could be splashed into eyes, protective eyewear is recommended. Approved to EU Standard EN166.
Hand protection		
Remarks	:	Where hand contact with the product may occur the use of gloves approved to relevant standards (e.g. Europe: EN374, US: F739) made from the following materials may provide suitable chemical protection. PVC, neoprene or nitrile rubber gloves Suitability and durability of a glove is dependent on usage, e.g. frequency and duration of contact, chemical resistance of glove material, dexterity. Always seek advice from glove suppliers. Contaminated gloves should be replaced. Personal hygiene is a key element of effective hand care. Gloves must only be worn on clean hands. After using gloves, hands should be washed and dried thoroughly. Application of a non-perfumed moisturizer is recommended. For continuous contact we recommend gloves with break-through time of more than 240 minutes with preference for > 480 minutes where suitable gloves can be identified. For short-term/splash protection we recommend the same but recognize that suitable gloves offering this level of protection may not be available and in this case a lower breakthrough time maybe acceptable so long as appropriate maintenance and replacement regimes are followed. Glove thickness is not a good predictor of glove resistance to a chemical as it is dependent on the exact composition of the glove material. Glove thickness should be typically greater than 0.35 mm depending on the glove make and model.
Skin and body protection	:	Skin protection is not ordinarily required beyond standard work clothes. It is good practice to wear chemical resistant gloves.
Respiratory protection	:	No respiratory protection is ordinarily required under normal conditions of use. In accordance with good industrial hygiene practices, precau- tions should be taken to avoid breathing of material. If engineering controls do not maintain airborne concentra- tions to a level which is adequate to protect worker health, select respiratory protection equipment suitable for the spe- cific conditions of use and meeting relevant legislation. Check with respiratory protective equipment suppliers.

#### Further information

Training advice	:	Provide adequate information, instruction and training for operators.
Other information	:	No Exposure Scenario annex is attached to this safety data sheet as it is a non-classified mixture containing no hazardous substances.
		A vertical bar ( ) in the left margin indicates an amendment from the previous version.
Sources of key data used to compile the Safety Data Sheet	:	The quoted data are from, but not limited to, one or more sources of information (e.g. toxicological data from Shell Health Services, material suppliers' data, CONCAWE, EU IUCLID date base, EC 1272 regulation, etc).

The information provided in this Safety Data Sheet is correct to the best of our knowledge, information and belief at the date of its publication. The information given is designed only as a guidance for safe handling, use, processing, storage, transportation, disposal and release and is not to be considered a warranty or quality specification. The information relates only to the specific material designated and may not be valid for such material used in combination with any other materials or in any process, unless specified in the text.
